# **Gulf Harbors Resident Launches FloatPlanWizard.com to Promote Safer Recreational Boating**

**FOR IMMEDIATE RELEASE - June 7, 2026**

GULF HARBORS, Fla. - FloatPlanWizard.com is a boating trip-planning and float plan service created by Gulf Harbors resident, longtime boater, and web developer Larry Wald to help recreational boaters create monitored float plans, organize trip details, and share trip information with trusted contacts.

FloatPlanWizard was created to promote safer recreational boating by making float plans easier, more accessible, and affordable.

FloatPlanWizard was built from a sincere belief that more recreational boaters should be using float plans. Many boaters head out for a simple day on the water, a fishing trip, a sandbar trip, or a longer cruise without leaving clear trip details with someone on shore. FloatPlanWizard was created to make that process easier.

"Boating safety tools only help if people actually use them. I do not want cost to be the reason someone skips creating a float plan. FloatPlanWizard is built to give everyday boaters an easy way to plan a trip, share important details, and keep trusted contacts informed."

## **Product Features**

Monitored float plans; boat trip planning tools; Active Cruise pages for underway trip status; Shared Trip pages for trusted contacts; marine weather access for members; mobile-friendly trip planning pages; and a companion app option for simplified check-ins.
